

Bijayakrishna Das

Technologist & Budding Entrepreneur.

bkdthenovelist@gmail.com

Summary

I am a full-stack polyglot software developer whose passion lies in building great products.

Broad experience in commercial software architecture and development. Experience in all stages of software development lifecycle.

High performance, high-availability secure reliable systems.

Experienced team and project lead, work well with customers. Agile and eXtreme Programming practitioner and mentor.

Quality advocate, self-motivated, excellent verbal and written communication skills.

*****Essential Responsibilities and Duties*****

1-Analyse, design, develop, and maintain products and assist in commercialisation.

2-Ensure product code and artefacts are managed according to guidelines.

3-Assist in identifying and organising requirements and producing specifications.

4-Apply usability procedures and principles as defined.

5-Build prototypes, products, and systems for testing.

6-Design testing procedures. Document test results and develop client presentation.

7-Develop and execute unit tests to ensure and maintain source code quality.

8-Provide timely corrective actions on all assigned defects and issues.

9-Create and maintain product documentation.

10-Provide support for and prepare technical documentation.

11-Share expertise throughout the organisation.

12-Continually evaluate engineering approaches and risks and make improvements.

13-Assist in cost estimates.
